

WELL PAD AND OILFIELD CLEAN-UP AND PERIODIC HYGIENE

CLEAN WELL PADS AND OTHER OIL SOAKED SURFACES EASILY:

- **COST EFFECTIVE**
- **CUTS O&M EXPENSE**
- **LONG LASTING**
- **WORKS ON OLD AND NEW SPILLS**
- **ALL - NATURAL AND ORGANIC**
- **BIODEGRADABLE**
- **NON - TOXIC**
- **VITAL PART OF SPCC PLANNING**
- **REDUCES REGULATORY EXPOSURE**

UniRemTech's **PRP**[®] and **OILBUSTER**[®] are specially designed for remediating oil spills of various types.

PRP[®] and **OILBUSTER**[®] are easy to apply manually, with a granular spreader or with a hydroseeder/sprayer. Once applied, they immediately and continuously absorb the oil and other hydrocarbons that it contacts. The **PRP**[®] and other ingredients comprise nutrients that help naturally occurring microorganisms from the environment flourish and then eat and metabolize the oil over a longer period, reducing harmful hydrocarbons to CO₂ and water.

THE COMPLETE OIL SPILL REMEDIATION SYSTEM

The **PRP**[®] in **OILBUSTER**[®] consists of tiny hollow spheres of treated wax, which contain nutrients. When a wax sphere comes in contact with spilled oil, it binds with the hydrocarbons. **PRP**[®] is also available as a loose powder for open water spills and many other forms depending on the specific requirement: water, hard surfaces, rocky surfaces or under-ground.

OILBUSTER[®] combines the power of UniRemTech's patented **PRP**[®] technology in a special blend of ingredients that increase the "fluidity" of the **PRP**[®]. **OILBUSTER**[®] is granular and carries the **PRP**[®] powder deep into difficult to reach areas beneath the surface of gravel and rocky areas, allowing it to absorb and facilitate bioremediation of hard to clean oil spills.
